

DAVID KOGAN

Software Developer

PROFILE

As a quick learner, I can adapt fast to new teams, projects and technologies. After one year of working as a freelance software developer, I gained a lot more experience and learned a lot of new skills. I always use VCS to version my code and TDD are also part of my work. My work is always focused on the client's needs to maximize the profit while lowering the cost.

TESTIMONIALS

"Not only did David do a great job on our project, working through a few challenges, but he even found a FREE way to do another project I had sent him when he could have just done the project another way. I would recommend David to anyone. THANK YOU, David!"

Stephen Coffey – Owner Plexis

"David is very professional, knowledgeable and easy to work with. He was able to fix all my problems. I have to ask him to help with. I feel fortunate to have found him and hope to be able to work with him for as long as he wants to."

Stephanie Scanlon – Owner Hollywood beauty magazine

"David has been reliable, efficient and easy to work with. He has developed a very complicated website with many dimensions to it. His organisational skills and work ethic are remarkable. I highly recommend David's services."
